As per OIMLR60, with P_{LC} = 0.7
 If the values for non-linearity (d_{lin}), relative reversibility error (d_{hy}) and temperature coefficient of sensitivity (TC_C) are added together, they are within the cumulated error limit specified in OIML R60.
 Off-center load deviation per OIML R76.
 EN 60 529 (IEC 529)

Cable assignment

6-wire cable connection (available cable lengths: 1.5 m; 3 m; 6 m; 12 m)

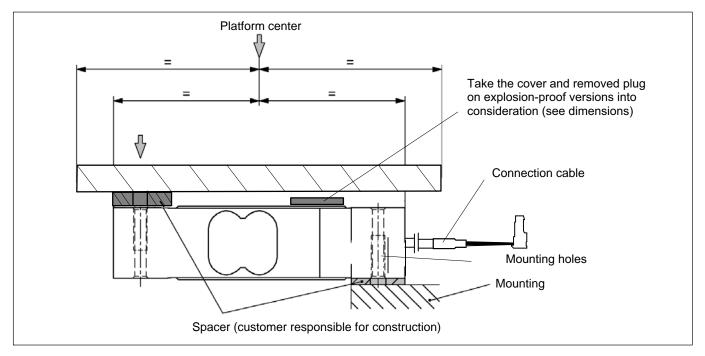

Mounting and load application

The load cells are attached at the mounting holes, the load is applied at the other end. The recommended screws and tightening torques can be found in the table below:

| Maximum capacities | Thread | Min. property class | Tightening torque ¹⁾ | | |
|--------------------|--------|---------------------|---------------------------------|--|--|
| 30500 kg | M8 | 10.9 | 32 N·m | | |
| 660 kg | M8 | 12.9 | 39 N⋅m | | |

¹⁾ Recommended value for the specified property class. Please comply with the screw manufacturer's instructions with regard to screw dimensions

Load must not be applied to the side where the cable connection is located, as this would cause a force shunt.
